

PATENT NO. 323734
SYSTEM AND METHOD FOR ACCESSING DATA USING WIRELESS COMMUNICATION

APPLICATION NO. 1325/DEL/2007

APPLICANT

Indian Institute of Technology, Delhi

ABSTRACT

the present invention provides a system for accessing data available online or offline using a display unit enabled with wireless communication comprising a display unit operatively associated with a computing means through at least one wireless communication link, said display unit being provided with control means to provide instructions to the computing means to effect one or more user-desired functions.
